EDUCATION

BE | Computer Science | 7.33 CGPA
NMIT, Visvesvaraya Technological University

Bangalore, India
Aug 2022 - June 2026

PU | PCMC | 77.5 Percentage
Liverpool SS/College, National Examination Board

Kathmandu, Nepal
Aug 2018 - June 2020

Class X | 87.5 Percentage
New Horizon Boarding School, National Examination Board

Beni, Nepal
Aug 2008 - June 2018

SKILLS

Languages	Python, C, Java, SQL
Web Development	HTML, CSS, JavaScript
App Development	Flutter, Android (Java/Kotlin)
Databases	MySQL, SQLite
Data Analysis	Pandas, NumPy, Matplotlib, Seaborn, LibROSA, OpenCv, Exploratory Data Analysis
Tools and Framework	Git, VS Code, Linux, Firebase, scikit-learn, Google AI Studio, Android Studio, Excel
Subjects	Operating Systems, Algorithms, DBMS, Computer Networks, AIML
Soft Skills	Communication, Management, Team Work

PROJECTS

Real-Time Messaging App

July 2024 - Sep 2024

- Developed a secure, real-time messaging app for Android using Android Studio and Java.
- Implemented AES encryption for secure message exchange.
- Integrated Google Firebase for real-time database and user authentication.
- Designed intuitive user interfaces focused on seamless and secure messaging.

HACKATHON PROJECTS

AI-Powered Job Fraud Detection System

13th June 2025 - 15th June 2025

- Built an AI-powered Streamlit app to detect fraudulent job postings, improving safety in the online job market.
- Combined rule-based heuristics with a Random Forest model to flag suspicious listings.
- Added an interactive dashboard showing fraud probability, labels, and risk levels.
- Tech stack: Python, Streamlit, scikit-learn, pandas, joblib, Plotly, NumPy.
- Designed for use by job seekers, recruiters, and analysts to assess job listing credibility and explore fraud patterns. ([Try it here](#))
